To finish passengers will eventually receive a first flight certificate signed by the pilot.

Useful information:

Flying season:

In Catalonia, it is possible to fly all year long. In fact, flying in winter offers some interesting advantages for the passengers: the weather is generally more stable what allows a longer flight and you can get up later as dawn takes place later in the morning.

Good weather conditions for a good flight:

Hot-air ballooning is an activity depending directly with the weather conditions. To ensure the flight, we absolutely need to have weak winds (less than 20 kmph) and no rain. In case of unsuitable weather conditions we would postpone the flight to another day.

Restrictions:

A hot-air balloon ride is a very safe activity but in order for our passengers to avoid running any risk, we advise pregnant women and children under 6 not to fly.
